

Flam-Guard 300 Range

Enhanced Fire Resistant Multi Core Cable

(Complies with BS 7629-1:2015)

Class 1 Solid Copper Conductor or Class 2 Stranded Copper Conductor/
Silicone Rubber Insulation / MICA Fire Barrier Tape / Aluminum
Electrostatic Screen/ Tinned Copper Circuit Protective Conductor/
Low Smoke Zero Halogen Sheath

Application

Enhanced fire-resistant cables are designed for safety systems which need to operate during multi-phase evacuations such as tower blocks, multi-story buildings or dense public buildings such as hospitals. Suitable for fire detection and fire alarm systems with 'enhanced' performance conforming to BS 5839-1 Code of Practice. Suitable for emergency lighting systems with 'enhanced' performance conforming to BS 5266-1 Code of Practice.

Manufactured with Low Smoke Zero Halogen (LSZH) insulation, making it suitable for installations in public buildings where, in the event of fire, smoke and acid gas evolution would pose a hazard to public life and equipment.

Cable Description

Class 1 Solid Copper Conductor to BS EN 60228 for 1.5mm²
Class 2 Stranded Copper Conductor to BS EN 60228 for 2.5mm² - 4.0mm²
Silicone Rubber Insulation Type EI2 to BS EN 50363
MICA (Fire Barrier) Overall Tape
Aluminum Electrostatic Screen
Tinned Copper circuit protective conductor
Low Smoke Zero Halogen Sheath

N.B. In the event of fire, the gases evolved from this cable are free from Halogen and the design is optimised to limit the quantity and cleanliness of the smoke evolved during this period. Although the acronym HFFR is applied to the sheath material, the terms LSOH, HFFR and HFFR are also applicable.

Insulation Colours

2 Core - Blue, Brown,

3 Core - Brown, Black, Grey

4 Core - Blue, Brown, Black, Grey

Sheath Colours

White / Red (Other Colours Available on Request)

Third party Accreditation

Cables are tested and approved by BASEC (British Approvals Service for Cables)

Cables are tested and approved by LPCB (Loss Prevention Certification Board)

Physical Characteristics

No of Conductors	Nominal Cross-Sectional Area (mm ²)	Nominal Radial Thickness Insulation (mm)	Nominal Radial Thickness Sheath (mm)	Approximate Overall Diameter (mm)	Maximum Conductor Resistance at 20°C (ohms/km)	Nominal Weight (kg/km)
